3) How long (exactly) is the road?	5.1km
4) What is the grid reference for the highest point of your island?	418546

teachers' notes

This worksheet is designed to enable students to extend their knowledge of topographical maps through creative expression. The worksheet could be blown up to A3 size, in which case students could work in pairs. You could also ask students to interpret this map (e.g. name 2 industries on the island).

These answers can also be found at www.wipeout.com.au/footprints/answers/
