

## 71: Zen & the art of paddling a C2

### suggested answers

- 2) Paddlers should wrap their top hand around the T of the paddle so that the paddle doesn't twist out of their hands/so that they can paddle more effectively.
- 3) Paddlers should keep their paddles on opposite sides so that they are less likely to flip/so that they are more likely to paddle in a straight line.

- 5) It **STEERS** the boat.
- 6) It **STEERS** the boat.
- 7) Both paddlers need to paddle as a team so that they paddle more effectively/so that they don't waste energy/so that they enjoy the experience more.
- 8) Both paddlers need to communicate. (The rear paddler can watch the front paddler & keep in time, but will still need to communicate.)
- 9) It is dangerous, because: a) the canoe might flip; b) the jumper might slip; c) the water might be shallow; and d) the paddler still in the boat may not be able to control the boat by themselves.
- 10) People will get wet & cold & mad as hell.
- 11) Boats that are full of water are very heavy & difficult to move.
- 12) Someone who has fallen into the water in a rapid must keep their feet up so that their feet don't get caught in a snag or a crack between rocks.
