

89: surviving the Death Zone

teachers' notes

1) We at Wipeout are really proud of this worksheet. On the one hand, it is pure fun. On the other hand, the game is very realistic. It is stacked against climbers making it to the top, and against them returning safely. Like all adventure, there is uncertainty and significant gamble.

2) This worksheet should ideally be enlarged to A3 size. It could be laminated or glued onto thin cardboard.

3) Playing this board game can either be a reward or a constructive way to break up the grind.

4) Trial it at home!
